

1 **What is claimed is:**

- 2 1. A wrench comprising a hollow handle and a head, the hollow handle having a
3 first, necked end and a second end, the first, necked end having a diameter
4 smaller than that of the second end of the hollow handle, the second end of
5 the hollow handle having an integral end wall for at least partially closing the
6 second end of the hollow handle, the head and the necked end of the hollow
7 handle being fused together.
- 8 2. The wrench as claimed in claim 1, wherein the second end of the hollow
9 handle is completely closed.
